Attachments: B21-02 Anvil Preliminary data Summary-QAO-210302.xlsx; B21-02 Anvil Method 210222.pdf; Copy of B21-02 Anvil Preliminary data checks and recoveries and Summary-QAO-210225_yll.xlsx

So,

The "Copy" spreadsheet from Yan contains a few more tabs of information than the other spreadsheet that I sent on "....210302".

Thuy/ Yaorong,

Attached is the latest spreadsheet I've seen circulated for the product data.....this one came from me.

QAO Comment: I believe the final decision to be made is what units to report the data in:

- 1) Either ng/mL (ppb): as per the "Product samples" tab on the attached spreadsheet, or
- 2) As ng/g (ppb): as per the "Product samples QAO 210302" tab on the attached spreadsheet.

Ex. 5 Deliberative Process (DP)

So.....

Ex. 5 Deliberative Process (DP)

If ng/mL

Subject: PFAS in products

Hi all

Now that the Agency released the data for the rinsates, Kimberly is going to ask for the memo of the products soon.

I have seen several spreadsheets for the products sent back and forth, and I know Paul has some questions about some results that we didn't report. Have those questions been answered?

If yes, Yaorong/Yan, please send to the group a final spreadsheet of the products results, using the same format as with the rinsates.

David/Ingeborg- after we get that spreadsheet, please create a graph for the products the same way you created for the rinsates.

I am drafting a memo now

Thank you so much for your work

Thuy
